Dear students,

Trees are our friends. They are very important in our lives. They give us oxygen, make cities and countries beautiful, and improve our environment.

Trees are very useful to humans and animals. Many kinds of fruit come from trees. Besides, people use trees to make wood. Many animals such as birds and squirrels make homes in trees.

We need to protect and plant trees, because protecting trees is also protecting our lives. Let's tell our friends and neighbours about the importance of trees and encourage them to protect and plant trees.
